

IYCE'11

International Youth Conference on Energetics

3rd International Youth Conference on Energetics 2011

7th July - 9th July, 2011 Leiria, Portugal

After the success of the first and second IYCE conferences in 2007 and 2009, we would like to provide again opportunity for young researchers (undergraduate, MSc, and PhD students and other young professionals) working in any field of energetics and power engineering to present their work in an international forum and make contacts for their future.

Topics include, but are not limited to:

1. Energetics

Power plants (conventional and nuclear too) • Fusion power research • Renewable energy sources • Distributed generation • Fossil and renewable fuels • Energy supply, energy efficiency • Actual questions of energy policy • Sustainable energy management • Energy in buildings

2. Power Engineering

Power quality • Power systems • Industrial electrostatics • Low frequency interference • High voltage DC transmission • Lightning protection • New solutions in electric traction • Applications of superconductors • Power electronics, controllers • Power system transients • Insulation technology and diagnostics • Protection and automation • Field computation

Venue:

Polytechnic Institute of Leiria, Portugal

Conference language:

English

Deadlines:

Friday 28th January, 2011

Summary submission

Friday 18th March, 2011

Full paper submission

Friday 29th April, 2011

Notification on acceptance

Friday 10th June, 2011

Final payment
